Inspiring doors and walls

Having a space where people can meet and work (together) is essential to employee wellbeing, health and productivity. However, due to challenging building joints and the variety of project participants, creating these spaces often runs into difficulties and frustration. Installing or moving walls takes considerable time, energy and money. Space-R relegates these problems to a thing of the past. Its plug-and-play wall profiles are easy to install or relocate, and leave the floors and ceilings unscathed. This doesn't mean compromising on design, either – thanks to mix-and-match material options. Space-R also provides excellent acoustics.
